FUND OVERVIEW

Actively managed by Marret Asset Management Inc., this ETF aims to provide positive absolute returns over any twelve month period with very low volatility and attractive monthly distributions, regardless of the interest rate or credit environment. The ETF will primarily focus on U.S. and Canadian corporate bonds, utilizing government bond futures to target an overall portfolio duration of less than 2 years. Additionally, the Fund will utilize government debt or futures to hedge the interest rate risk of its corporate debt in order to isolate the credit risk of such holdings.

At least 90% of the non-Canadian currency exposure attributable to the units will be hedged to the Canadian dollar.

KEY REASONS TO INVEST

- Actively managed by Barry Allan and Paul Sandhu, two of Canada's preeminent bond investors, with over 60 years of combined fixed income experience.
- Flexible mandate seeking positive absolute returns regardless of the interest rate or credit environment.
- Focus on providing very low volatility and superior risk-adjusted returns.
- Attractive monthly distributions.

¹The Trailing 12 Month Yield is calculated on the Fund's actual distributions paid to investors over the past 12 months based on NAV. All distributions are paid in cash.

²The indicated rates of return are the historical annual compounded total returns, including changes in unit value and do not take into account sales, redemption or optional charges or income taxes payable by a security holder that would have reduced returns. The rate of return chart shown is used only to illustrate the effects of the compound growth rate and is not intended to reflect future values of the Index or the Fund or returns on investment in the Fund.
