INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI First Asset MSCI USA Low Risk Weighted ETF (the Fund) is to replicate, to the extent possible, the performance of the MSCI USA Risk Weighted Top 150 Index (the Index or Benchmark), net of expenses. In respect of the Common Units, the Fund's investment objective is to replicate, to the extent possible, the performance of the MSCI USA Risk Weighted Top 150 Index (CAD Hedged) and in respect of the Unhedged Units, the Fund's investment objective is to replicate, to the extent possible, the performance of the MSCI USA Risk Weighted Top 150 Index, net of expenses. The investment strategy of the Fund is to invest in and hold the constituent securities of the Index. The Index is based on a traditional market capitalization weighted parent index, the MSCI USA Index, which includes U.S. large and mid-capitalization stocks. Constructed using a simple, but effective and transparent process, each security of the parent index is reweighted so that stocks with lower risk are given higher index weights. The final constituents of the Index are determined by ranking these security level risk weights and taking top 150 subset securities. The Index seeks to emphasize stocks with lower historical return variance and tend to have a bias towards lower size and lower risk stocks. Historically, the Index has exhibited lower realized volatility than the parent index, while maintaining reasonable liquidity and capacity. The only difference between the indices is that the CAD Hedged is 100% hedged to the Canadian dollar by notionally "selling" each foreign currency forward at the one-month forward exchange rate at the end of each month.

RISK

There were no changes to the Fund over the period of this report that materially affected the overall level of risk associated with an investment in the Fund. Unitholders should refer to the prospectus as it contains a detailed discussion of risk and other considerations relating to an investment in the Fund. The prospectus is available free of charge on our website at www.firstasset.com and on SEDAR at www.sedar.com.

RESULTS OF OPERATIONS

The Fund's net assets increased by \$12.6 million to \$45.0 million from December 31, 2018 to December 31, 2019. The Fund had net sales of \$6.2 million for the year. The Fund paid distributions totalling \$1.5 million while the portfolio's performance increased assets by \$7.9 million. Common Units returned 26.7% after fees and expenses for the year ended December 31, 2019. Over the same time period, the Fund's benchmark returned 26.9%.

Please refer to the "Past Performance" section which outlines the performance of the Fund's other units.

The Fund slightly underperformed its benchmark for the year.

Unlike the end of 2018, when many investors were questioning the sustainability of the upward equity market, 2019 ended the year on a positive note, with U.S. and Canadian

stock markets hitting all-time highs. U.S. equities, as measured by the S&P 500 Index, had a very strong year, returning 31.5%, despite trade disputes, cautious central banks and a slowing economy that concerned investors several times. Canadian equities, as measured by the S&P/TSX Composite Index, posted a total return of 22.9%, underperforming the U.S.

At the beginning of the year, investors had been anticipating two interest rate increases by the U.S. Federal Reserve Board (Fed) in 2019. However, early in the year, it was clear that these increases would not come to fruition. The Fed reduced the federal funds rate by 75 basis points (bps) by the end of 2019, in an effort to extend the business cycle, as inflation remained low despite extremely tight labour markets.

The Fund's top-performing sectors included the financials, utilities and information technology sectors, which contributed +424 bps, +384 bps and +312 bps, respectively, to performance. Top individual contributors to performance included Fiserv Inc. (+38 bps), The Southern Co. (+35 bps) and Arch Capital Group Ltd. (+34 bps).

The weakest sector performance came from energy (+10 bps), consumer discretionary (+56 bps) and communication services (+59 bps). Individual detractors from performance included The Clorox Co. (-2 bps), CenterPoint Energy Inc. (-2 bps) and UnitedHealth Group Inc. (-2 bps).

Any notable changes in the Fund's holdings were related to Index rebalancing activity. Portfolios are obtained from MSCI and rebalanced as per its direction with respect to constituents and weightings.

RECENT DEVELOPMENTS

The U.S. economy is expected to slow somewhat in 2020 with real gross domestic product (GDP) growth expected at 1.8% versus 2.3% in 2019. The signing of the U.S.-China phase one trade deal avoided escalating tariffs and has reduced investor anxiety. U.S. inflation is expected to increase somewhat, but still remain near the Fed's target.

Effective April 29, 2019, First Asset ETFs were rebranded as CI First Asset ETFs.

On July 1, 2019, First Asset Investment Management Inc. amalgamated with CI Investments Inc. (CI). After the amalgamation, members of the Independent Review Committee (IRC) of the CI family of funds also became members of the First Asset Funds' IRC (together, the CI Funds IRC). Previous members of the First Asset Funds' IRC resigned on June 30, 2019.

Effective September 19, 2019, James McPhedran became a member of the IRC of CI Funds and effective August 15, 2019, John Reucassel resigned as a member of the IRC of CI Funds.

RELATED PARTY TRANSACTIONS

Manager, Trustee and Portfolio Manager

CI is the Manager, Trustee and Portfolio Manager of the Fund. CI is a subsidiary of CI Financial Corp. The Manager, in consideration of management fees, provided management services required in the day-to-day operations of the Fund.

Management fee rates as at December 31, 2019, for each of the classes are shown below:

	Annual management fee rate (%)
Common Units	0.600
Unhedged Common Units	0.600

The Manager received \$0.2 million in management fees for the year.

Management Fees

100% of management fees were used to pay for investment management and other general administration.

Independent Review Committee

The Fund received standing instructions from the Fund's IRC with respect to the following related party transactions:

- a) trades in securities of CI Financial Corp.; and
- b) purchases or sales of securities of an issuer from or to another investment fund managed by the Manager.

The applicable standing instructions require, amongst others, that related party transactions be conducted in accordance with the Manager's policies and procedures and applicable law and that the Manager advise the IRC of any material breach of such policies. The standing instructions also require that investment decisions in respect of related party transactions (a) are free from any influence by an entity related to the Manager and without taking into account any consideration relevant to an entity related to the Manager; (b) represent the business judgment of the Manager uninfluenced by considerations other than the best interests of the Fund; (c) are made in compliance with the Manager's policies and procedures; and (d) achieve a fair and reasonable result for the Fund. Transactions made by the Manager under the standing instructions are subsequently reviewed by the IRC on a quarterly basis to monitor compliance.

The Fund relied on the IRC's standing instructions regarding related party transactions during this reporting year.

Except as otherwise noted above, the Fund was not a party to any related party transactions during the year ended December 31, 2019.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal year. The higher a Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the year.

PAST PERFORMANCE

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that distributions made by the Fund in the years shown were reinvested in additional units of the relevant classes of the Fund. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

Year-by-Year Returns

The following charts show the Fund's annual performance for each of the years shown and illustrate how the Fund's performance has changed from year to year. In percentage terms, the charts show how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year, except where noted.

¹ 2014 return is for the period from February 5, 2014 to December 31, 2014.

Annual Compound Returns

The following table shows the Fund's annual compound returns for each year indicated, compared to the MSCI USA Risk Weighted Top 150 Total Return Index and the S&P 500 Total Return Index.

The MSCI USA Risk Weighted Top 150 Index is based on a traditional market capitalization weighted parent index, the MSCI USA Index, which includes U.S. large- and mid-capitalization stocks. Each security of the parent index is reweighted so that stocks with lower risk are given higher index weights. The final constituents of the Index are determined by ranking these security level risk weights and taking the top 150 subset securities

The S&P 500 Index is an index composed of 500 stocks weighted by capitalization and representing all major U.S. industries. The Index is a broad measure of the stock performance of the largest U.S. companies with market capitalization in excess of US\$5.3 billion.

A discussion of the performance of the Fund as compared to the benchmark is found in the Results of Operations section of this report.
