Management Report of Fund Performance for the period ended June 30, 2020

This semi-annual management report of fund performance contains financial highlights but does not contain the complete semi-annual or annual financial statements of the investment fund. You can get a copy of the semi-annual or annual financial statements at your request, and at no cost, by calling 1-800-563-5181, by writing to us at CI Investments Inc., 2 Queen Street East, Twentieth Floor, Toronto, ON, M5C 3G7 or by visiting our website at www.firstasset.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

RESULTS OF OPERATIONS

The Fund's net assets decreased by \$2.8 million to \$10.0 million from December 31, 2019 to June 30, 2020. The Fund had net redemptions of \$1.4 million for the period. The Fund paid distributions totalling \$0.2 million while the portfolio's performance decreased assets by \$1.2 million. The Fund returned -8.6% after fees and expenses for the six-month period ended June 30, 2020. Over the same time period, the Fund's benchmark returned -8.3%. The benchmark is the Morningstar® Canada Target Dividend Total Return Index™ (the Index or the Benchmark).

While all major North American equity indices hit new highs in February 2020, the same indices had declined over 30% by mid-March as COVID-19 spread globally. The S&P/TSX Composite Index declined 37% in March from its earlier high. By the end of June, however, it was down only 14% from its high after making significant gains.

In response to the turmoil in capital markets and the economy, the Bank of Canada (BoC) cut its overnight rate three times, from 1.75% to 0.25%. Government of Canada (GoC) five-year bond yields declined by 132 basis points (bps) to 0.4%, while the two-year GoC bond yield was down 141 bps to 0.3%. The credit spread on provincial bonds widened, with the spread on the five-year Province of Ontario bond moving from 40 bps at the beginning of the year, hitting 92 bps in March, and ending June at 52 bps. Canadian banks agreed to a six-month moratorium on mortgage payments, if requested, and the Canadian government provided emergency funds to individuals and businesses who had lost jobs or revenues as a result of COVID-19.

Credit spreads on investment-grade bonds widened, from 128 bps at the end of February to 300 bps by March month-end, partially recovering to 160 bps at the end of June. High-yield spreads also widened considerably, from 500 bps in February to 860 bps in March, ending June at 650 bps. This was still better than the spread widening that occurred in 2008 when high-yield spreads hit over 1800 bps. The current credit crisis has been driven by a health crisis, one that necessitated government-mandated industry shutdowns and shelter-in-place restrictions. Central banks and governments were able to leverage the lessons learned from 2008 and acted swiftly to add liquidity. The U.S. Federal Reserve Board (Fed) and the BoC introduced bond purchase programs to provide liquidity and to reintroduce quantitative easing. For the first time, the Fed announced it would purchase exchange traded funds holding corporate bonds as part of the effort to add liquidity to the secondary markets.

Globally, banks were also better capitalized in comparison to the prior downturn, and were able to keep financing themselves, in contrast to 2008. Also, U.S. non-bank investment dealers were eligible to borrow from the Fed's discount window, unlike in early 2008 when it was available only to banks.

During the first half of the period, the information technology sector continued to have the strongest returns, with many stocks reaching all-time highs at the end of the first quarter. Companies participating in online marketplaces or facilitating the new work-from-home reality benefited from the impact of the COVID-19 pandemic. Most sectors were negatively impacted by the expected decline in overall economic activity caused by protocols enacted to limit the spread of the virus. Financials were further impacted by declining interest rates. Energy stocks saw the biggest declines in the period as the price of oil plummeted.

The Fund's top-performing sectors were the energy, consumer discretionary and communication services sectors, which contributed 532 bps, 15 bps and -132 bps, respectively, from performance. Top individual contributors to the Fund's performance were Ovitiv Inc. (+830 bps), Gibson Energy Inc. (+209 bps) and National Bank of Canada (+165 bps).

Exposure to the real estate (-518 bps), financials (-373 bps) and industrials (-220 bps) sectors detracted from the Fund's performance, as did holdings in H&R REIT (-293 bps), NFI Group Inc. (-280 bps) and RioCan REIT (-230 bps). The Fund's management fee of 60 bps also detracted from performance.

Any notable changes to the Fund's holdings were related to Index rebalancing activity. Portfolios are obtained from Morningstar and rebalanced as per their direction with respect to constituents and weightings.

Overall, the Fund slightly underperformed its benchmark for the period.

RECENT DEVELOPMENTS

The unprecedented amount of liquidity and market support provided by central banks, and a potentially flattening of the COVID-19 infection curve, have already given way to a historic equity rebound since the lows in March. Broad market gauges, such as the S&P 500 Index, have returned close to the highs in February 2020, suggesting a near full recovery to pre-pandemic levels.

However, these implied expectations for a strong and rapid economic recovery may not match reality when upcoming economic figures relating to jobs and gross domestic product are released. The upcoming earnings season will also provide a reality check to determine if equity markets have come too far, too fast. Market volatility, as measured by the CBOE Volatility Index, also remains high, suggesting the risk remains elevated for significant moves lower in equities.

CI First Asset Morningstar Canada Dividend Target 30 Index ETF

Management Report of Fund Performance for the period ended June 30, 2020

We expect heightened uncertainty to continue through the second half of 2020, compounded by the upcoming presidential election in the U.S. this November. After the deflationary impact of lower activity initially resets pricing lower, inflationary pressures are expected to start to build in markets that were not already extended, caused by a rapid decline in capital expenditure investment, massive government bond issuance and a tacit policy of dollar devaluation by the Fed.

Effective April 3, 2020, Stuart Hensman resigned as a member of the Independent Review Committee (IRC) of CI Funds and effective April 3, 2020, Donna Toth was appointed as a member of the IRC.

RELATED PARTY TRANSACTIONS

Manager, Portfolio Manager and Trustee

CI Investments Inc. is the Manager, Portfolio Manager and Trustee of the Fund. CI Investments Inc. is a subsidiary of CI Financial Corp. The Manager, in consideration of management fees, provided management services required in the day-to-day operations of the Fund.

Management fee rate as at June 30, 2020, for the Class is shown below:

| | Annual management fee rate (%) |
|--------------|--------------------------------|
| Common Units | 0.600 |

The Manager received \$0.03 million in management fees for the period.

Management Fees

100% of total management fees were used to pay for investment management and other general administration.

Related Issuer Trading

Related issuer trading occurs when a Fund purchases or sells securities of CI Financial Corp. These transactions are executed through market intermediaries and under prevailing market terms and conditions. The IRC reviews such transactions during scheduled meetings. During the period ended June 30, 2020, the Fund engaged in related issuer trading or held position(s) in CI Financial Corp. at the end of the period.

Independent Review Committee

The Fund has standing instructions from the Fund's IRC with respect to the following related party transactions:

- a) trades in securities of CI Financial Corp.; and
- b) purchases or sales of securities of an issuer from or to another investment fund managed by the Manager.

The applicable standing instructions require, amongst others, that related party transactions be conducted in accordance with the Manager's policies and procedures and applicable law and that the Manager advise the IRC of any material breach of such policies. The standing instructions also require that investment decisions in respect of

related party transactions (a) are free from any influence by an entity related to the Manager and without taking into account any consideration relevant to an entity related to the Manager; (b) represent the business judgment of the Manager uninfluenced by considerations other than the best interests of the Fund; (c) are made in compliance with the Manager's policies and procedures; and (d) achieve a fair and reasonable result for the Fund. Transactions made by the Manager under the standing instructions are subsequently reviewed by the IRC on a quarterly basis to monitor compliance.

The Fund relied on the IRC's standing instructions regarding related party transactions during this reporting period.

Except as otherwise noted above, the Fund was not a party to any related party transactions during the period ended June 30, 2020.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Net assets per unit and distributions per unit are based on the actual number of units outstanding for the relevant Class at the relevant time. The increase (decrease) in net assets from operations per unit is based on the weighted average number of units outstanding for the relevant Class over the fiscal period.

(3) Distributions are automatically reinvested in additional units of the Fund.

(4) This information is provided for the period ended June 30, 2020 and the years ended December 31.

| Dec. 31, 2015 | 33,475 | 3,750 | 0.67 | 0.67 | 0.06 | 122.63 | 8.95 |

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period.

(5) This information is provided for the period ended June 30, 2020 and the years ended December 31.

(6) Closing market price.

PAST PERFORMANCE

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that distributions made by the Fund in the periods shown were reinvested in additional units of the Fund. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

Year-by-Year Returns

The following chart shows the Fund's semi-annual and annual performance for each of the periods shown and illustrates how the Fund's performance has changed from period to period. In percentage terms, the chart shows how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period, except where noted.

1 2012 return is for the period from February 6, 2012 to December 31, 2012.

A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements about the Fund, its future performance, strategies or prospects, and possible future Fund action. The words "may," "could," "should," "would," "suspect," "outlook," "believe," "plan," "anticipate," "estimate," "expect," "intend," "forecast," "objective," and similar expressions are intended to identify forward-looking statements.

Forward-looking statements are not guarantees of future performance. Forward-looking statements involve inherent risks and uncertainties, both about the Fund and general economic factors, so it is possible that predictions, forecasts, projections and other forward-looking statements will not be achieved. We caution you not to place undue reliance on these statements as a number of important factors could cause actual events or results to differ materially from those expressed or implied in any

forward-looking statement made by the Fund. These factors include, but are not limited to, general economic, political and market factors in Canada, the United States and internationally, interest and foreign exchanges rates, global equity and capital markets, business competition, technological changes, changes in laws and regulations, judicial or regulatory judgments, legal proceedings and catastrophic events.

The above list of important factors that may affect future results is not exhaustive. Before making any investment decisions, we encourage you to consider these and other factors carefully. All opinions contained in forward-looking statements are subject to change without notice and are provided in good faith but without legal responsibility.
