RESULTS OF OPERATIONS

The Fund's net assets increased by \$6.2 million to \$36.3 million from December 31, 2021 to June 30, 2021. The Fund had net sales of \$2.8 million for the period. The Fund paid distributions totalling \$0.3 million while the portfolio's performance increased assets by \$3.7 million. Variably Hedged units returned 11.4% after fees and expenses for six-month period ended June 30, 2021. Over the same time period, the Fund's benchmark returned 12.4%. The benchmark is the WisdomTree International Quality Dividend Growth Total Return Index Variably (CAD-Hedged).

As the global economy continued to reopen and COVID-19 vaccination rates steadily rose, equity markets continued to rebound. U.S. equities, as measured by the S&P 500 Index, were up 15.2%, while Canadian equities, as measured by the S&P/TSX Composite Index, gained 17.3%. Economic acceleration was a key theme, with gross domestic product (GDP) and other economic indicators, corporate earnings, and stock market indexes hitting historic year-over-year growth rates from the lows of 2020. Cyclical and value-oriented stocks outperformed broader markets while growth and information technology stocks struggled.

The end of lockdowns and the reopening of economies also impacted fixed income markets, with bond yields rising. The two- and 10-year Government of Canada rates rose to 0.45% and 1.39%, respectively, while in the United States, two- and 10-year rates rose to 0.25% and 1.47%, respectively. Yields peaked near the end of the first quarter of 2021 and declined in the second quarter but still stayed significantly higher.

Inflation rose as well, especially in used vehicles, transportation and energy. Commodities rebounded on the prospect of a weaker U.S. dollar and hope for infrastructure stimulus packages in the United States. Housing markets saw strong growth as well. The U.S. Federal Reserve and the Bank of Canada both viewed the elevated inflation rates as transitory, and no interest rate increases were expected in 2021.

The Fund underperformed its benchmark for the period. Allocations to the utilities, energy and real estate sectors detracted from the Fund's performance. Positions in Neste OYJ, Chugai Pharmaceutical Co. Ltd. and Orsted AS were the largest individual detractors from performance.

Exposure to the materials, industrials and consumer discretionary sectors contributed to the Fund's performance. Top individual contributors to performance included holdings in LVMH Moët Hennessy Louis Vuitton SA, ASML Holding NV and Rio Tinto Plc.

Any notable changes to the Fund's holdings during the period were related to rebalancing activity. Portfolios are obtained from WisdomTree and rebalanced as per its direction with respect to constituents and weightings. The Fund's management fee is 63 basis points.

RECENT DEVELOPMENTS

If inflation runs above central bank expectations, interest rate increases may come sooner and larger than forecast, likely adversely affecting both bond and equity markets. Investors are watching labour markets, wages and growth statistics in an attempt to determine when central banks might be forced to act. As COVID-19 restrictions are removed, certain areas of the world have experienced dramatic increases in new infection rates, which is delaying a full economic reopening. Although vaccines appear to offer protection against new COVID-19 variants, it is uncertain whether this protection will continue.

Registered office address

Effective on or about August 1, 2021, the Fund's registered office address changed from 2 Queen Street East, Twentieth Floor, Toronto, Ontario, M5C 3G7 to 15 York Street, Second Floor, Toronto, Ontario M5J 0A3.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period.

(5) This information is provided for the period ended June 30, 2021 and the years ended December 31.

(6) Closing market price.

PAST PERFORMANCE

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that distributions made by the Fund in the periods shown were reinvested in additional units of the Fund. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

Year-by-Year Returns

The following chart shows the Fund's semi-annual and annual performance for each of the periods shown and illustrates how the Fund's performance has changed from period to period. In percentage terms, the chart shows how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period, except where noted.

¹ 2016 return is for the period from July 12, 2016 to December 31, 2016.
